

PhD Admission under AcSIR at ICMR-NIRRCH January-2026 session

ICMR-NIRRCH invites application for full-time PhD program in the Faculty of Medical Research under the Academy of Scientific and Innovative Research for the January 2026 session. Prospective PhD candidates passionate about exploring the complexities of Reproductive and Child Health across various domains are invited to apply to the program.

Students who have been awarded the ICMR fellowship (list II) to pursue a Ph.D. at ICMR Institutes are encouraged to apply.

Our primary research domains

- ❖ Infertility and reproductive disorders
- ❖ Infections including HIV/AIDS and their immunopathogenesis
- ❖ Maternal, child, and adolescent health
- ❖ Pregnancy-related disorders
- ❖ Paternal contribution to pregnancy-related disorders
- ❖ Menstruation, embryo implantation, placentation
- ❖ Functional genomics of rare diseases
- ❖ Reproductive and genetic toxicology
- ❖ Reproductive tract cancers
- ❖ Computational biology in the context of reproductive health

Our research interests also lie in developing organ-on-chip models, stem cell models, contributions of microbiomes and metabolomes in various disorders, and developing indigenous diagnostics as well as point-of-care devices.
